

Income Disclosure

The GSPRO.network ("Platform") Compensation Plan is an exciting opportunity that rewards you for selling our proprietary services and for sponsoring other members/participants who do the same. Although the opportunity is unlimited, individual results will vary depending on market conditions, commitment levels, availability of time and financial resources, access to a large network of family, friends & business contacts, and most important of all – the sales skills of each member/participant.

Since GSPRO has recently launched, it lacks enough statistical data to prepare reliable income disclosures. Once the Company has accumulated enough reliable data, a more robust and detailed income disclosure will be made readily available.

The numbers below reflect **estimates** prepared by the company pending a more detailed survey to be conducted after its first year. Based on industry standards and company projections, the average annual gross revenue for members/participants is projected to be anywhere between **500 and 2,000 (equivalent value in €)**. These numbers do not reflect the expenses associated with building a GSPRO independent member business, which could exceed the commissions received.

There will certainly be members/participants who will earn less while others will earn more. We're excited about the GSPRO Compensation Plan and we're confident it will provide you a solid foundation to help you to grow your skills and achieve your goals.

If income projections were presented to you prior to your enrolment, such projections are not necessarily representative of the income, if any, that you can or will earn through your participation, as an independent member in the Compensation Plan. These income projections should not be considered as guarantees or projections of your actual earnings or profits. Because there will even be those who dedicate a significant amount of time, effort, and personal funds and none the less fail to achieve a meaningful level of success, GSPRO results will naturally vary.
